

WHAT IS CLAIMED IS:

1 1. An electric junction box, comprising:
2 a first cover body, having a first space defined by peripheral walls;
3 a plurality of protruded portions, each having a through hole, and
4 outwardly protruded from at least one of the peripheral walls so as to define a
5 groove communicated with the first space and the through hole;
6 a plurality of retainers, each provided with one of the protruded
7 portions;
8 a second cover body, fitted with the first cover body so as to close the
9 first space, while being retained by the retainers; and
10 a third cover body, comprising a plurality of projections provided on
11 an outer periphery thereof, the third cover body being disposed in the first
12 space such that each of the projections is fitted into the groove so as to
13 partition the first space from the through hole.

1 2. The electric junction box as set forth in claim 1, wherein each of the
2 retainer is a retaining projection formed in the groove so as to extend toward
3 the first space.

1 3. The electric junction box as set forth in claim 1, further comprising:
2 a first electric equipment, disposed between the first cover body and
3 the third cover body; and
4 a second electric equipment, disposed between the second cover
5 body and the third cover body.
